DEPARTMENT OF BIOCHEMISTRY

October 23

Dear Dr. Lederberg

We are hoping to do  
some biochemical work on the  
lysogenic phages. Aaron Novick  
suggested that you would  
be the best one to ask for  
plants of E. coli strain K-12  
and of the indicator strain  
of coli for the lysogenic phage.

✓  
My best regards,

Floyd Hylleberg
